THE COMPANY PROFILE 2017

[WWW.AIRODYTRADING.COM](http://WWW.AIRODYTRADING.COM)

## WHO WE ARE?

We would like to introduce ourselves as leading manufacturer of Ventilation Products in the Middle East. Airody was founded in 2013 in UAE and since then more than 12 members of staff, passionately develop, produce and distribute ventilation products to almost all Middle East countries. Prominent brands, world class manufacturers and related supplies / products have been associated with Airody. In a nutshell, sophisticated products combined with

professional approach and a customized service has made Airody a frontrunner in providing complete equipment solutions` across the Gulf region.

**A Business that makes nothing  
but Money is a Poor Business.**

-Henry Ford

## WHAT WE DO?

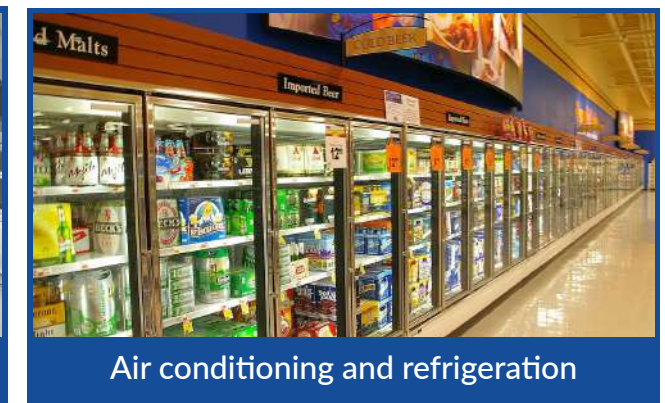

Airody has undertaken many prestigious assignments across the U.A.E. With the able support from its principals, and presence in the Gulf market is a standing testimony to its quality and dependability.

Our program consists of different type of Kitchen Equipments and Hoods, Dampers, Shutter fire dampers, Motorized Fire and smoke dampers, Volume control dampers, Back draft dampers, Extract dampers. Weather louvers, Sand Trap Louvers. Variable Air Volume units. Chilled water Fan coil units. And all ranges of Grilles & Diffuser. Fields of application for the products of

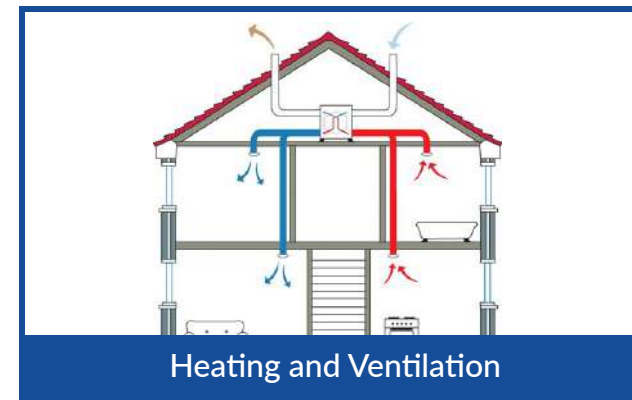

Airody are as follows:

Commercial Kitchen Ventilation & Equipments

Air conditioning and refrigeration

Heating and Ventilation

Tunnel Ventilation

Clean Room Technology

## WHO WE REPRESENT

- Teknoklima(BOREAS) - Turkey: Eurovent certified AHU, FAHU Hygiene Units, Ecology units and Pool Units
- AAC Eurovent - UK : Leading air filtration and liquid phase filtration specialist with a core market in carbon filter technology.
- Climacon Hoods - Finland: Commercial Kitchen Hoods (UV and Non UV), Ceiling ventilation, Air purifications, Transfer units.
- Waves Aircon - India: Leading manufacturers of AHU, Purification Uunits, FCU and Electrostatic filters.
- Delta Valves - Germany: Full range of Chilled water, Plumbing and Portable valves.
- JIMCO - Denmark: Air purification units for Air, Water and Surfaces.
- Sanu Ventillation - Italy: Centrifugal Fans, Axial Fans, Industrial Filtration and Ducts
- Infrico and Sammic - Italy: Kitchen Equipment and Locally fabricated hoods, Cold rooms, Ecology unit.
- Hurricane - Germany : Smoke eaters, Hotel star and Water Purification systems
- PPP - USA : Copper Water Hammer Arrestors
- SURGEX-S - SS Water Hammer Arrestor and Flow meters.

## HURRICANE GERMANY

Hurricane Technologies is a German based company which is working in different fields focusing on implementing new technologies for indoor air products.

Our main focus is on advanced Ozone technology which will help to eliminate unpleasant odors and to control air borne contamination outbreaks in various fields.

As a company with highly qualified professionals we have more than 50 years of experience in our team which makes us a global expert in our field. Our scientists, engineers and doctors are accredited on individual universities and laboratories around the globe, which helps us to gain the latest research studies and to implement those updates in our products development.

Our philosophy is not only to sell a product but rather a complete solution for your problem.

If you have problems with smell, unpleasant odors, viruses, fungi, bacteria, mildew or germs in your facility, please contact us for a free consultation and we will find the right solution for it.

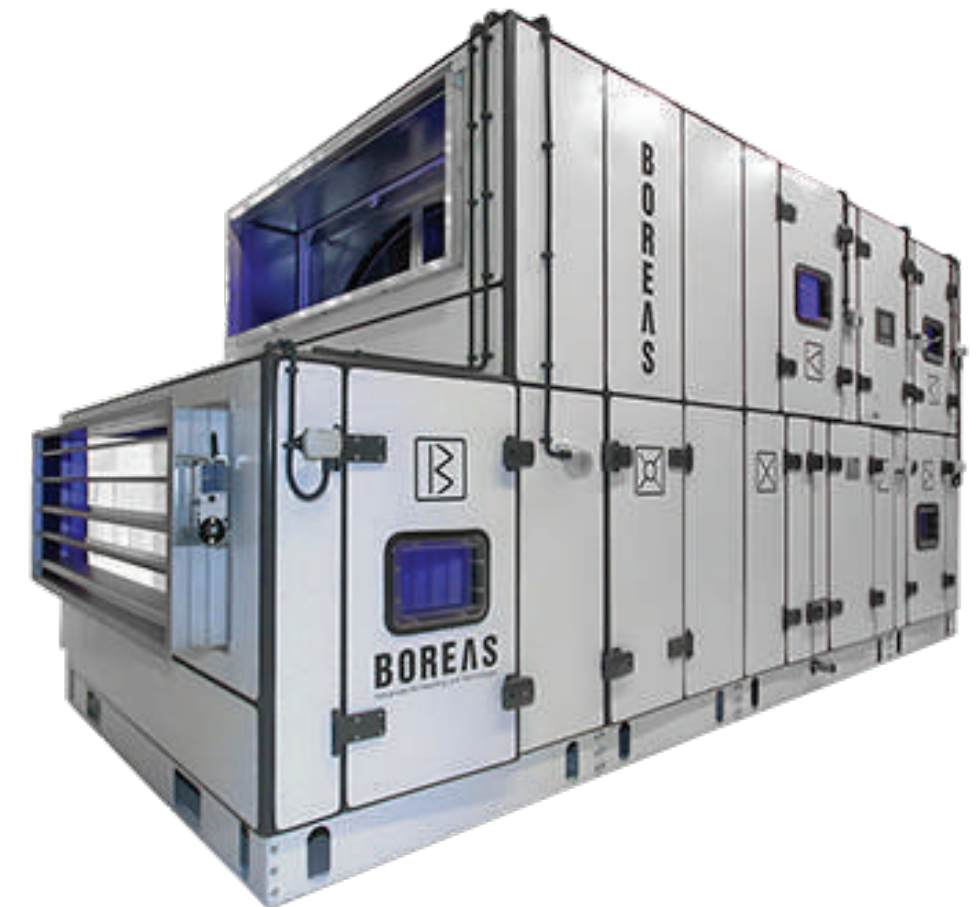

## SURGEX-S AUSTRALIA

SURGEEx-S series is a bellows type, water hammer arrester with all components fabricated from Stainless steel. SURGEEx-S arrester has NPT threaded male end connections (BSP ends are also available) and is available in sizes from 1/2" to 1". Series S is complying with the most updated international standards and requirements related to the design and manufacture of water hammer arresters.

## BOREASCLIMA TURKEY

Our company Teknoklima, which we established in 1995, continues with our regional directorates, partners and dealers in 12 countries including Turkey, Iraq, Azerbaijan, Turkmenistan and Kazakhstan in the scope of the agreement we made with Samsung Electronics System Climbers in our services we started with distributorship activities in the air conditioning sector. In 2014, we decided to combine our engineering infrastructure and know-how in the system air conditioners sector and we opened our first production facility in Istanbul Beylikduzu with 5000 m2 closed area. Our productions are continuing as air conditioning plants (Dx and Sulu), hygienic type operating room package devices, swimming pool air conditioners, compact heat recovery devices. Comply with all requirements of the HVAC industry, we produce high quality and we have to promote our brand in 2014, and inspired by the mythology of the North Wind BOREAS gave his name. We pay special attention to high quality standards in our products. Our aim is to ensure that our brand finds the value that it deserves not only in our country but also in a wide geographical area.

## CLIMECON FINLAND

Climecon story Officially, the Climecon story begins already in the year 1984. The ability to renew and continuous development work is the thing for us. We have kept on investing in it since we want to offer the best and most clever solutions. Being clever means us that products are not only of high quality and energy-efficient but also stylish and easy to install. "Attitude that rocks" The spirit of Climecon is about ambition, attitude that rocks and about getting things done with an attitude. We are proud of our work and the way of doing things. The uncompromising work with our customers results - and have resulted - in satisfied customers.

Trust is important. When we promise we deliver. Today Climecon is a growing agile company that is internationalizing fast. We are constantly setting our sights to the future. Digitalization is shaking up the world and urbanization constantly changes the way of living. We want to be at the forefront of this change by developing even more clever solutions.

## AAC EUROVENT UK

The AAC ESP Electrostatic Precipitator is one of a range of air cleaners designed for commercial kitchen extraction systems. These compact and lightweight filtration units efficiently filter fine particles from a flowing gas using the force of an induced electrostatic charge. This is achieved by the low pressure drop across the electrostatic filter which allows large volumes of air to be handled without significantly slowing down flow rates ensuring the highest efficiency for the highest flow rates.

## JIMCO DENMARK

Jimco A/S is the company behind some of the world's most unique air and waste-water purification and sterilisation solutions. Since designing its very first air-cleaning unit in 1993, Jimco A/S has not looked back. It is no coincidence that Jimco A/S supplies air-treatment units to some of the biggest chains in the world – including McDonald's, Scandic Hotels, Daloon, Danish Crown etc. Authorised Jimco A/S installers, who can be found worldwide, of course install all systems and units. At the same time, Jimco A/S undertakes all types of maintenances of systems and plants, while also offering individual service agreements. Over the years, Jimco A/S has been awarded a number of prizes for its products – including the EU's environmental award, the environmental award of the Region of Funen "Fyns Amts Miljøpris" and business excellence award "Langelands Erhvervspris."

## DELTA GERMANY

Delta Valves was founded in 1987. The original intent of the business was to distribute high quality, German made valves to the Iron & Steel Industries located in Germany. In 1989, the Company modified its business plan to include the manufacturing of a high quality HVAC & Plumbing Valves. The decision to do so was a combination of the valve markets need for a superior valves and a local foundry closing its doors. The team at Delta prides itself in its ability to quickly transform new research and development concepts into real performing valves. These concepts come from both within Delta's engineering group and from its clients. The team at Delta is dedicated to providing the best valves for the most demanding industries.

## OUR SERVICES

Airody specializes in all things of Cold Storage & Refrigeration, Turnkey Installation

- Design
- Supply and Installation
- Site Visit
- Project Management Repairs
- Annual maintenance contracts

We specialize in cold room design, production and installation. As a major cold room developer in the Gulf area we have substantial purchasing power, ensuring Airody's customers will receive the highest quality product at very competitive cost usually within 7-14 days. The cold room will then be built on your site complete with refrigeration and commissioning as required by our team of professional refrigeration engineers. Our panels are constructed from either Polyurethane or Polystyrene laminated with a sheet of white food safe metal internally and externally. They have been used for food processing factories, for the cold storage of all types of food, pharmaceuticals, chemicals, laboratory products, etc.

## WE ALSO SERVE

Supply and Installation of Air Conditioning and Refrigeration Equipment Manufacturing Items:-

 Kitchen Hoods & Equipment's.	 Cold Rooms.	 Air Purification Units	 Variable Air Volume Boxes.
 Acoustic Silencers & Noise control products	 Fire & Motorized Fire/ Smoke Dampers.	 Louvers-Weather & Sand Trap	 Grills & diffusers.
